SFP with SC connector

Hello, everyone, hope you have a good day. Let me introduce myself. But firstly, please guess, who am I:

SC/PC-SC/PC SM SX 3.0mm 5M

ILA1: 0.06   RLA1:51.9

ILA2: 0.14   RLA2:53.6

S/N:1101160014

Have you seen me before? Do not tell me not. 😳. I am a Patch Code/pigtail 🙂, with SC/PC connector. Do you know what I would do today? Let me tell you: Firstly, let me show my SC/PC connector:

What can I do? I can only connect with SC slot. Do you know SC slot? Please:

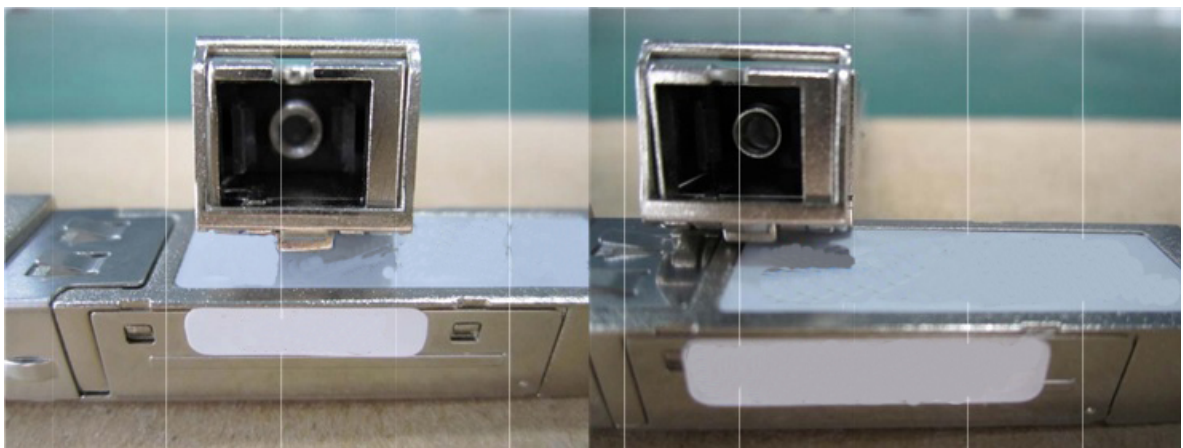

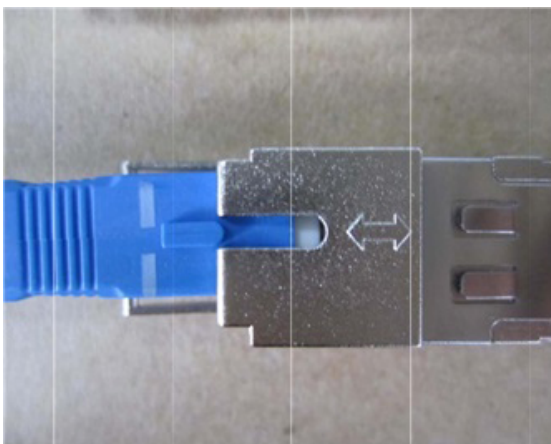

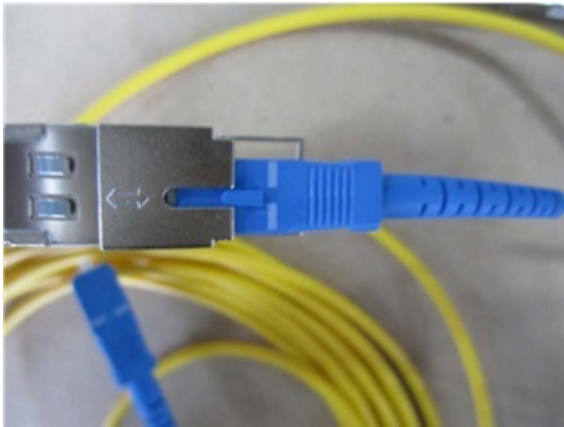

Those two SC slots from the twins. One is OBB24531A, SFP Bi-Di transceiver, 1.25G TX1490/Rx1550nm 100KM SC DDMI 0~70℃ +3.3V, another one is OBB25431A, SFP Bi-Di transceiver, 1.25G TX1550/Rx1490nm 100KM SC DDMI 0~70℃ +3.3V, they look like
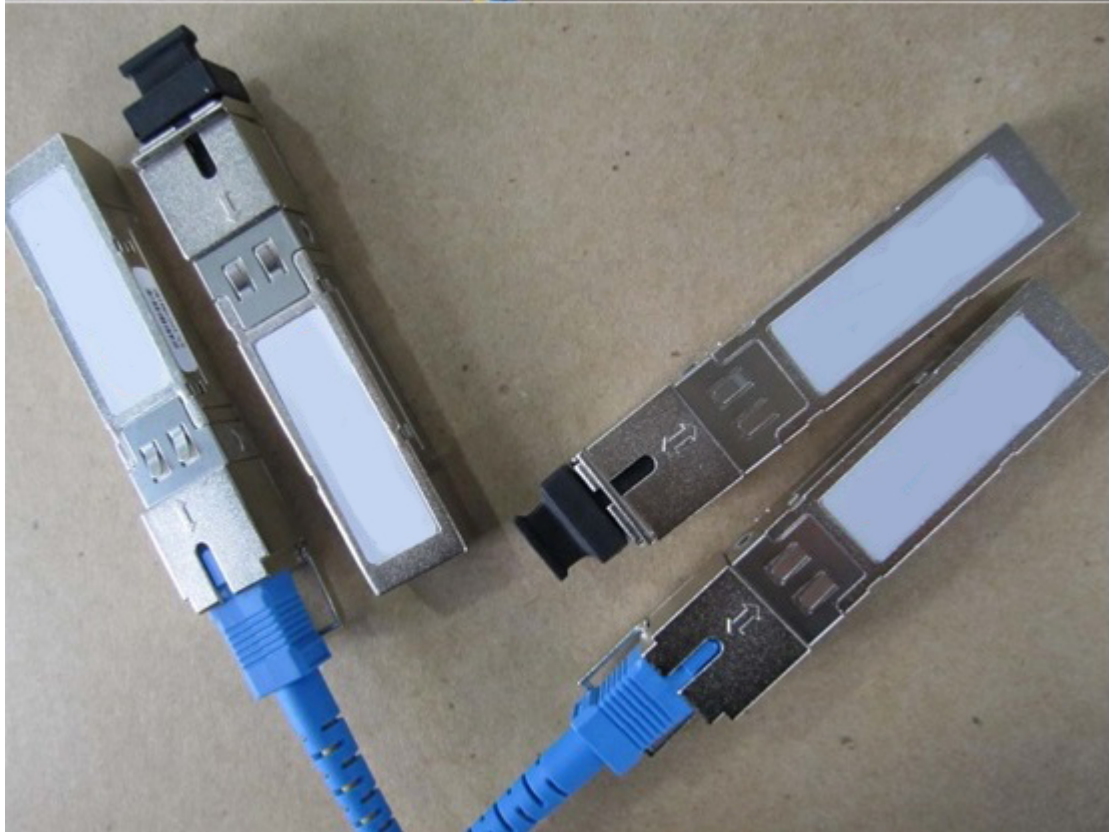

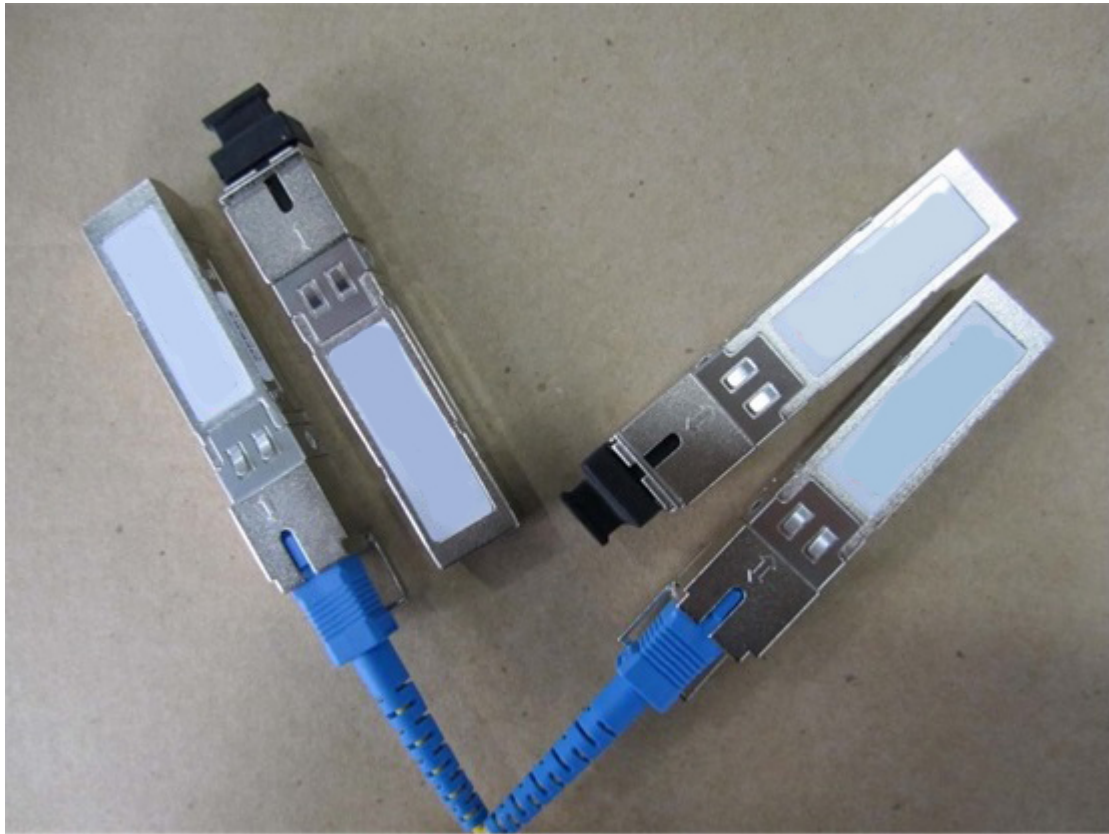

similar. Today they get angry with each other. So I should connect them together. Oh, look them:
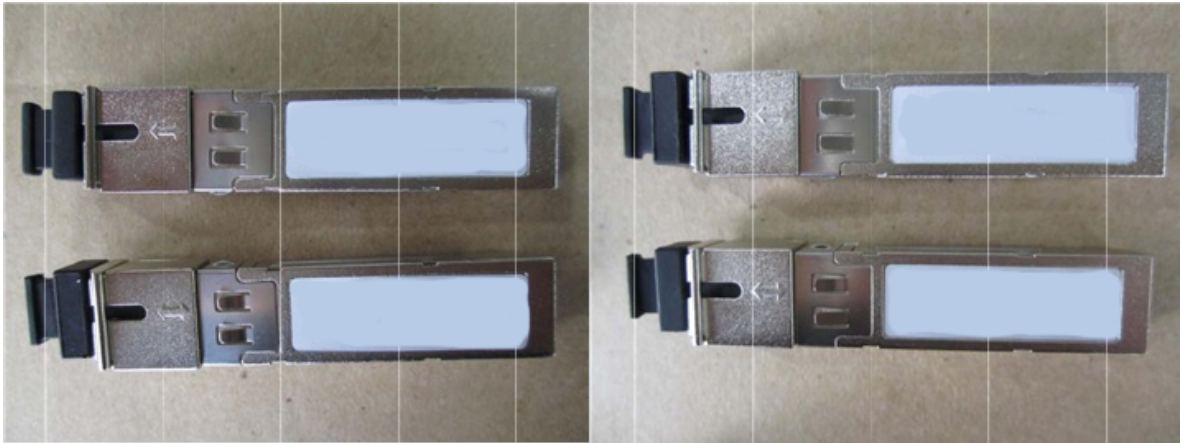

Do not angry, let me help you.

Ok, we are good twins now, good friends.

Do you know why I can do that? It is a secret, enen~~~, just because I have SC connect, they have SC slot, so I can insert in them, so we are good friends.
